Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-31 and 38-67 are drawn to an apparatus, classified in class 606, subclass 103.
- II. Claims 32-37 are drawn to a method, classified in class 606, subclass 86.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process of reducing the rod, in a spinal fixation surgery, can be performed either by hand or by several devices currently in the market.

Furthermore, the apparatus as claimed could be used in another practice, such as reducing metal rods used in constructing a building.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Examiner Comments

Examiner notes that the application was filed with two separate and distinct specifications (specifically the body of "description of the preferred embodiments" section), though both seem to represent the apparatus and method, as claimed. The first specification (pages 5-18) starts on page 5 with second paragraph reciting "Referring now generally to Figs 1-12..." and the next paragraph starts with "Base 22 in the illustrated embodiment includes upper base portion 24 and lower base portion 26." The second specification (pages 31-39, after the abstract on page 30) recites "Referring now generally to Figs 1-3, ..." with the next paragraph starting with "Base 22 in the illustrated embodiment is roughly rectangular, having a relatively rearward part 32 and a relatively forward part 34." At this time, examiner chooses to follow the first specification and will disregard the second specification. Correction is required. Applicant is advised to refer to MPEP in regards to correcting the specification. Applicant is reminded that new subject matter is not allowed.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John Kim whose telephone number is (571) 272-2817. The examiner can normally be reached on M-F 8-4:30.
